SUMMARY

As a dedicated 4th-year BSIT candidate, I bring a versatile technical skill set bridging full-stack web development, structured data encoding, Management Information System, automated booking tools, and ecommerce applications—I have built a strong foundation in software quality and database structure. I excel in fastpaced environments that require quick mastery of new software stacks and meticulous data accuracy. Driven by a commitment to lifelong learning and engineering excellence, I am prepared to contribute immediate value to engineering and data operations teams.

CORE COMPETENCIES

- Full-stack web development (frontend + backend)
- High-volume data encoding with fast, accurate typing
- Rapid mastery of new software stacks
- Database design, schema modeling, and SQL
- Microsoft Word, Excel, and spreadsheet formulas
- Thrives in fast-paced, deadline-driven environments

TECHNICAL SKILLS

Full-Stack Web Development
HTML5, CSS3, JavaScript, React, Tailwind CSS, Node.js, Express, PHP, REST APIs, Responsive Design

Databases & Data Management
MySQL, Database Design, Schema Modeling, SQL Queries, CRUD Operations, Data Validation, Record Management

Data Operations & Office Tools
Fast & Accurate Typing, Data Encoding, Microsoft Word, Microsoft Excel, Spreadsheet Formulas, Document Management, Attention to Detail

Tools & Professional Skills
Git & GitHub, VS Code, Vercel, Netlify, XAMPP, Figma, FastPaced Adaptability, Quick Software Mastery

SELECTED PROJECTS

HRMIS — Human Resource Management Information System (**Live:** hrmis-tawny.vercel.app) **2025**

Stack: React, Tailwind CSS, JavaScript, Vercel

- Web-based HR platform centralizing employee records, attendance, leave requests, and administrative workflows into a single interface.
- Designed the relational database structure for employees, departments, attendance logs, and leave records.
- Implemented role-based views for administrators and staff, plus validated forms to prevent incomplete or invalid data.
- Deployed publicly on Vercel.

Library Management System **2024**

Stack: HTML, CSS, JavaScript, PHP, MySQL

- Searchable book catalog with borrow/return tracking and automated overdue detection.
- Admin dashboard for managing books, borrowers, and lending transactions with full CRUD operations.

Booking Management System **2024**

Stack: React, Tailwind CSS, Node.js, MySQL

- Reservation platform with real-time slot availability to prevent double-bookings.
- User-facing booking flow with confirmation and history, plus an admin panel for schedule and reservation management.

E-Commerce Management System **2023**

Stack: HTML, CSS, JavaScript, PHP, MySQL

- Product catalog with category filtering and search, shopping cart, and checkout flow with order records.
- Admin dashboard for products, inventory, and order tracking with relational data handling.

…and 46+ additional academic and personal projects covering web systems, databases, and management platforms.

EDUCATION

Bachelor of Science in Information Technology (BSIT) **4th Year · Currently Enrolled**

Coursework: Software Engineering, Database Management, Web Systems, Data Structures & Algorithms, Networking, Systems Analysis.

ADDITIONAL INFORMATION

- Typing speed and data-entry accuracy suited to high-records)
- Comfortable with Microsoft Word and Excel (formulas, volume encoding
